

Richmond Primary School iPad App List- Grade 3/6 2020

The applications listed below indicate the apps required by students in Grade 3/6 in 2020. These apps will be available on school owned iPads and purchased under licence arrangements by the school, the costs of which will be accounted for as part of the \$100 levy. Families of students volunteering to be part of the BYOD (Bring Your Own Device) program will not be required to pay the levy but will be asked to purchase these apps and ensure they have been installed on their child's iPad for the commencement of 2019 and the necessary upgrades have been undertaken. The school technician will also need access to these devices so they can be set up to access the school's wireless network.

Please note that the costs provided below are subject to change and are indicated as an approximate price only.
